PROJECTS

EXAM PREPARATION WEBSITE (01/2022 - 03/2023)

- Here I create a ExamPrep website that helps student to find a specific course, specific department, or specific year/semester exam paper.
- My Role in this project is as a front-end developer. I created web pages for better user experience.

Movie-App (02/2024 - 04/2024)

- Movie-App is a React-based movie website that allows users to search for movies by title, sort them by genre, view trending and upcoming movies.. The website is designed to be user-friendly and visually appealing.
- Search and watch movies: users can search for movies by title and can watch them easily
- Trending Movies: displays a section for trending movies
- Popular movies: displays a section for upcoming movies

AMAZON CLONE (10/2023 - 11/2023)

- Developed a full-scale Amazon clone using HTML and CSS to replicate the functionality and design of the popular e-commerce platform. Leveraged modern web development techniques to create a user-friendly interface with a responsive design that adapts seamlessly to various screen sizes

Cynthia-Ugwu-Portfolio-Clone (04/2024 - 10/2024)

- Cynthia-Ugwu-Portfolio-Clone project. This project is a clone of the award-winning personal portfolio website of Cynthia Ugwu, a talented product designer.
- The goal of this project is to showcase skills in HTML, CSS, and JavaScript, while incorporating advanced features like Locomotive JS and GSAP Scroll Trigger.
